# **GIGABYTE**

# **R281-200**

## Rack Server - 2U DP 24-Bay

## inte **XEON**

(intel) OPTANE<sup>®</sup>DC 🏈

## **Features**

- 2nd Gen. Intel<sup>®</sup> Xeon<sup>®</sup> Scalable Processors
- 6-Channel RDIMM/LRDIMM DDR4, 24 x DIMMs
- Supports Intel<sup>®</sup> Optane<sup>™</sup> DC Persistent Memory
- Dual 1Gb/s LAN ports (Intel<sup>®</sup> I350-AM2)
- 1 x Dedicated management port
- 24 x 2.5" SATAIII hot-swap HDD/SSD bays in front side
- 2 x 2.5" SATAIII hot-swap HDD/SSD bays in rear side
- 8 x PCIe Gen3 expansion slots
- · 2 x OCP Gen3 x16 mezzanine slots
- Aspeed<sup>®</sup> AST2500 remote management controller
- 1+1 1200W 80 PLUS Platinum redundant power supply

## Intel<sup>®</sup> Xeon<sup>®</sup> Scalable Family Processors

GIGABYTE's Intel® Xeon® Scalable Processor family servers are available in dual socket configurations, and are compatible with the full family of different SKUs (Bronze, Silver, Gold and Platinum) that are workload optimized to support different applications, from enterprise IT database, cloud and storage to the most high-demand HPC workloads.

### Compute:

- Up to 28 cores / 56 threads per socket
- · Up to 12 DIMMS per socket

48 PCIe 3.0 lanes per socket

## Intel<sup>®</sup> Optane<sup>™</sup> DC Persistent Memory Ready

GIGABYTE's 2nd Gen. Intel® Xeon® Scalable family servers come ready to support Intel Optane DC Persistent Memory, a revolutionary new product that re-defines traditional memory & storage architectures by enabling a large persistent memory tier between DRAM and SSDs, that's higher capacity than DRAM and faster than SSDs, enabling the user to bring more data closer to the CPU for faster time for insight.

## GIGABYTE Management Console (AMI MegaRAC SP-X)

This GIGABYTE server product utilizes a AMI MegaRAC SP-X platform for BMC server management, with a feature rich and easy to use browser-based graphical user interface.

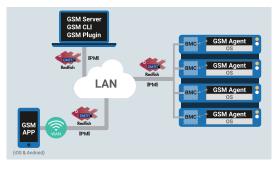

- RESTful API support (including the latest DMTF standards of Redfish) allows the administrator to integrate with 3rd party applications for server management
- HTML5-based iKVM remote management client included as a standard feature, no additional add-on license required to purchase
- · Detailed FRU information from SMBIOS
- · Pre-event automatic video recording feature from 10 to 30 seconds
- · SAS / RAID controller monitoring feature

## GIGABYTE Server Management (GSM)

GIGABYTE Server Management (GSM) is GIGABYTE's proprietary multiple server remote management software platform, available as a free download from each GIGABYTE server product page. GSM is compatible with either IPMI or Redfish (RESTful API) connection interfaces, and comprises the following sub-programs:

 GSM Server
 GSM CLI GSM Agent 
 GSM Mobile 
 GSM Plugin

- Memory:
- 6 channels, 2 DIMMs per channel
  - · Up to 2933MHz max memory speed
  - Intel Optane DC Persistent Memory ready
- Up to 38.5 MB L3 cache (non-inclusive) • Up to 3x UPI socket interconnects @10.4 GT/s
- CPU TDP 70W 205W

### I/O:
