

## How to update your Waterforce X Water Cooler Firmware

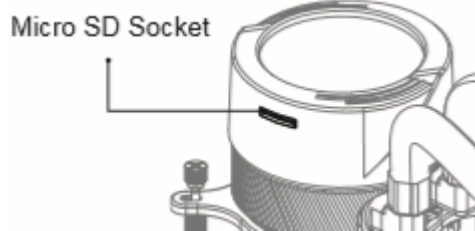

1. Prepare a MicroSD card
2. Extract the .zip file
3. Place the ITEPKG03.PKG file into the MicroSD card via a card reader

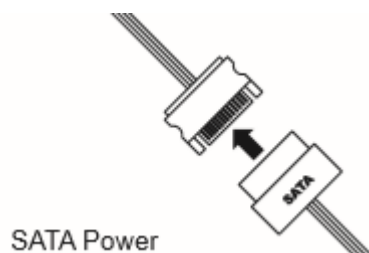

4. Disconnect the Water Cooler's SATA power cable

5. Insert the MicroSD card into the Water Cooler

6. Reconnect the SATA power cable

7. The Firmware update process will start automatically, and this process will take approximately 5 minutes
8. Once the LCD display flashes "Finished", disconnect the SATA Cable then reconnect it again to resume normal operation.
