Congratulations on your purchase of the GIGABYTE Notebook P27!
This Manual will help you to get started with setting up your notebook. For more detailed information, please visit our website at http://www.gigabyte.com. All specifications are subject to the manufacturer's configuration at the time of shipping and may change without prior notice, written or otherwise.

Using GIGABYTE Notebook for the First Time

To install the battery please follow these steps:

1. Insert the battery pack into the compartment.
2. Remember to slide the switch to the "Lock" position.

To connect the power cord:

1. Connect the power cord to the AC adapter.
2. Connect the AC adapter to the DC-in jack on the back side of the notebook.
3. Connect the power cord to the power outlet.
**Switching on the Power:**
After you turn on the P27 for the very first time, do not turn it off until the operating system has been configured. Please note that the volume for the audio will not function until Windows® Setup has completed.

**Booting Up the P27 for the First Time:**
Depending on your configuration, the Microsoft® Windows® Boot Screen will be the first screen that you will see as the notebook starts up. Follow the on screen prompts and instructions and enter your personal information to complete the setup of the Windows® Operating System.

Setup Your System for RAID 0/1

WARNING

- Please backup your data before you build and run RAID 0/1 on your system.
- RAID 1 needs two storage drives of the same specification and capacity in your laptop.
- RAID 0 needs two storage drives of the same specification in your laptop. Different capacity is acceptable.

1. Press F2 when computer starts to Enter BIOS setup utility.
   - Go to Advanced > SATA configuration.

2. Change "SATA Mode selection" from "AHCI" to "RAID".
   - Press F10 to save and exit. The system will restart automatically.

3. Once the system restarts. Go to "All Apps" found at the bottom of the screen on Windows 8 and execute Intel Rapid Storage program.

4. You will see the Intel Rapid Storage Technology Screen, Click> Create.

5. Under Select Volume Type choose Optimized disc performance (RAID 0/1), Click > NEXT.
   - Under Configure Volume you may set Name to your preferred name and select both controllers.
   - Click > Next. You will see Confirm Volume Creation. Click > Create volume.
   - Wait until the system migration is complete and restart the laptop.
Smart USB Backup Guide (Original: Recovery Image USB)

⚠️ WARNING

- You can backup original recovery image through this application in case of losing by device damage.
- You can backup original recovery image to USB disk and restore the system if any storage system replacement with the recovery USB disk.
- Before you restore the system through the recovery USB disk, please make sure that you have already made the backup of your data.
- Please DO NOT shut down or un-plug the system when performing backup through recovery USB disk.

1. Please plug in the USB disk which is at least 20GB in capacity to make the original image (backup the data in USB first. All data will be eliminated during the creation of recovery USB disk).

2. Insert the driver disk to your optical drive and run the install of "Smart USB Backup" (for none-ODD model, please use USB ODD device or download from http://www.gigabyte.com).

3. Run the “Smart USB Backup” after finishing the install.

4. Select your USB disk from the drop-down list and start to create the recovery USB disk.

5. The window will pop out when the creation of recovery disk is done.
   - Please press F12 on starting the system when you need to restore the system. Select “boot from recovery USB disk” and the system will be restored.
   - The time needed for restore will be around 30 mins (time needed may vary by USB disk model).
Recovery Guide

System Recovery (Restore your laptop operating system)
When something is going wrong with the laptop operating system, the storage of the laptop has a hidden partition containing a full back up image of the operating system that can be used to restore the system to factory default settings.

Note
- If the storage has been switched or the partition deleted, the recovery option will no longer be available and a recovery service will be needed.
- The recovery function is only available on devices with O/S preinstalled. Devices with DOS do not have the recovery function.

Launch System Recovery
The system recovery feature is preinstalled before the laptop is shipped from the factory. The option menu allows you to launch the Windows recovery tool to reinstall the operating system to factory default.
The brief introduction below will show you how to start the recovery tool and restore your system.

All ready to go
Make sure your PC is plugged in. This will take a few minutes.

Windows 7 Recovery Guide

1 Turn off and restart the laptop.

2 During the laptop turn on process, press and hold F9 key to launch the tool.

3 The recovery will be activated and you will see the option buttons on the window. Click on “Recovery” to start it.

Caution
Once the “Recovery” is selected, your personal data and files will be deleted after the laptop starts restoring, and the operating system will be reset to factory default settings.
### Windows 8 Recovery Guide

1. **Turn off and restart the laptop.**

2. Press and release the Power button to turn on the operation system. Press “F9” to enter into GIGABYTE System Recovery. Use Directing Hot Key to operate GIGABYTE Smart Recovery.

3. Choose your keyboard layout. You can press “See more keyboard layouts” to see next page of languages.

4. Choose “Troubleshoot” to enter the recovery settings.
   (Also you can choose “Continue” to exit recovery system and continue to Windows 8 for files or data backup.)

   **There are two options for system recovery**
   - **Refresh your PC**
     You can refresh your laptop to improve the system stability without losing your files.
   - **Reset your PC**
     If you want to remove all of your files, you can reset your PC completely.

   **Caution:** All personal data and files will be lost.
Choose “Refresh your PC”
[Click on “Next”] > [Choose a target operating system.] > [Click on “Windows 8”.] > [Click on “Refresh” to execute recovery function.]

Here are what will happen
- Your files and personalization settings won’t be changed.
- Your PC settings will be restored to factory default settings.
- Apps from Windows Store will be kept.
- Apps you installed from discs or websites will be removed.
- A list of removed apps will be saved on your desktop.

Choose “Reset your PC”
[Click on “Next”] > [Choose a target operating system.] > [Click on “Windows 8”.] > [Choose an option to recover your system]

➤ Just remove my files
  Only personal data and files will be removed, but computer settings will be kept.

➤ Fully clean the drive
  The drive will be completely restored to factory default settings. It takes more time. > [Click on “Reset” to execute recovery function.]

Here are what will happen
- All of your personal files and apps will be removed.
- Your PC settings will be restored to factory default settings.

Advanced options

System Restore
Use a restore point recorded on your PC to restore Windows.

System Image Recovery
Recover Windows using a specific system image file.

Automatic Repair
Fix problems that keep Windows from loading.

Command Prompt
Use the Command Prompt for advanced troubleshooting.

UEFI Firmware Settings
Change settings in your PC’s UEFI firmware.
Windows 8.1 Recovery Guide

1. Turn off and restart the laptop.

2. Press and release the Power button to turn on the operation system. Press “F9” to enter into GIGABYTE System Recovery. Use Directing Hot Key to operate GIGABYTE Smart Recovery.

3. Choose “Troubleshoot” to enter the recovery settings. (Also you can choose “Continue” to exit recovery system and continue to Windows 8.1 for files or data backup.)

There are two options for system recovery
- Refresh your PC
  You can refresh your laptop to improve the system stability without losing your files.
- Reset your PC
  If you want to remove all of your files, you can reset your PC completely. Caution: All personal data and files will be lost.

4. Choose “Refresh your PC”
   Choose an account to continue.

Here are what will happen
- Your files and personalization settings won’t be changed.
- Your PC settings will be restored to factory default settings.
- Apps from Windows Store will be kept.
- Apps you installed from discs or websites will be removed.
- A list of removed apps will be saved on your desktop.

Choose “Reset your PC”
- Just remove my files
  Only personal data and files will be removed, but computer settings will be kept.
- Fully clean the drive
  The drive will be completely restored to factory default settings. It takes more time. > [Click on “Reset” to execute recovery function.]

Here are what will happen
- All of your personal files and apps will be removed.
