Recovery Guide

System Recovery (Restore your laptop operating system)

When something is going wrong with the laptop operating system, the storage of the laptop has a hidden partition containing a full back up image of the operating system that can be used to restore the system to factory default settings.

Note

- If the storage has been switched or the partition deleted, the recovery option will no longer be available and a recovery service will be needed.
- The recovery function is only available on devices with O/S preinstalled. Devices with DOS do not have the recovery function.

Launch System Recovery

The system recovery feature is preinstalled before the laptop is shipped from the factory. The option menu allows you to launch the Windows recovery tool to reinstall the operating system to factory default.

The brief introduction below will show you how to start the recovery tool and restore your system.

All ready to go

Make sure your PC is plugged in. This will take a few minutes.

Windows 7 Recovery Guide

1

Turn off and restart the laptop.

2

Press and release the Power button to turn on the operation system. Press “-” to enter into GIGABYTE System Recovery. Use Directing Hot Key to operate GIGABYTE Smart Recovery.

3

The recovery will be activated and you will see the option buttons on the window. Click on “Recovery” to start it.

Caution

Once the “Recovery” is selected, your personal data and files will be deleted after the laptop starts restoring, and the operating system will be reset to factory default settings.

4

A progress indicator bar will show on the window when the recovery process is running. Please make sure the AC-adaptor is plugged in and do not turn off the laptop.

5

Reboot the laptop after the system recovery is complete.

Windows 8 Recovery Guide

1

Turn off and restart the laptop.

2

Press and release the Power button to turn on the operation system. Press “-” to enter into GIGABYTE System Recovery. Use Directing Hot Key to operate GIGABYTE Smart Recovery.

3

Choose your keyboard layout.

You can press “See more keyboard layouts” to see next page of languages.

4

Choose “Troubleshoot” to enter the recovery settings.

(Also you can choose “Continue” to exit recovery system and continue to Windows 8 for files or data backup.)

There are two options for system recovery

- **Refresh your PC**

You can refresh your laptop to improve the system stability without losing your files.

- **Reset your PC**

If you want to remove all of your files, you can reset your PC completely.

Caution: All personal data and files will be lost.

5

■ Choose “Refresh your PC”

[Click on “Next”] > [Choose a target operating system.] > [Click on “Windows 8.”] > [Click on “Refresh” to execute recovery function.]

Here are what will happen

- Your files and personalization settings won't be changed.
- Your PC settings will be restored to factory default settings.
- Apps from Windows Store will be kept.
- Apps you installed from discs or websites will be removed.
- A list of removed apps will be saved on your desktop.

■ Choose “Reset your PC”

[Click on “Next”] > [Choose a target operating system.] > [Click on “Windows 8.”] > [Choose an option to recover your system]

▶ Just remove my files

Only personal data and files will be removed, but computer settings will be kept.

▶ Fully clean the drive

The drive will be completely restored to factory default settings. It takes more time. > [Click on “Reset” to execute recovery function.]

Here are what will happen

- All of your personal files and apps will be removed.
- Your PC settings will be restored to factory default settings.
