# SOP for OCP LAN solution with NCSI support:

Supported OCP LAN card model name:

CLNO832: 10G SFP+ Intel 82599
CLNO222: 10G BaseT Intel X550

Step-by-step configuration:

1. Enable onboard NCSI Switch jumper

2. Install OCP card
3. Change setting in BIOS or WebUI BMC configuration to NCSI / Share NIC
4. Install management LAN cable to OCP LAN port 0
5. Save setting and power cycle server
6. Start BMC management share NIC support from OCP LAN port 0
   Note limitation, if you switch over to OCP, original onboard NSCI no longer
   supported
