

Smart USB Backup Guide / Smart USB Backup 使用說明

(Original: Recovery Image USB / 原Recovery Image USB)

⚠ WARNING / 警告

- You can backup original recovery image through this application in case of losing by device damage.
為避免儲存裝置毀損導致原廠的還原映像檔遺失，您可以透過此軟體來備份原廠的還原映像檔。
- You can backup original recovery image to USB disk and restore the system if any storage system replacement with the recovery USB disk.
如果您想更換新的儲存裝置，您可以透過此軟體將原廠還原映像檔備份至 USB 隨身碟，安裝好新的儲存裝置後，再將出廠的預設系統倒回新儲存裝置。
- Before you restore the system through the recovery USB disk, please make sure that you have already made the backup of your data.
使用本軟體所製作的還原 USB 隨身碟 將系統還原以前，請先做好資料備份，以免資料流失。
- Please DO NOT shut down or un-plug the system when performing backup through recovery USB disk.
利用還原 USB 隨身碟進行系統還原時，請勿移除或關掉電源。

1

- Please plug in the USB disk which is at least 20GB in capacity to make the original image (backup the data in USB first. All data will be eliminated during the creation of recovery USB disk)

若要製作原廠映像檔的還原 USB 隨身碟，請先插入容量至少有 20GB 的 USB 隨身碟（請先將 USB 隨身碟裡原有的資料備份，避免因下述操作造成 USB 隨身碟裡的資料遺失）

2

- Insert the driver disk to your optical drive and run the install of “Smart USB Backup” (for none-ODD model, please use USB ODD device or download from <http://www.gigabyte.com>) 放入驅動程式光碟，執行安裝 “Smart USB Backup”。（無內建光碟機的機種，請外接 USB 光碟機；若光碟內沒有軟體，請上 <http://www.gigabyte.com> 下載）。

3

- Run the “Smart USB Backup” after finishing the install.
安裝完成後，執行桌面上的 “Smart USB Backup”。

4

- Select your USB disk from the drop-down list and start to create the recovery USB disk.
從清單中選取剛剛插入的 USB 隨身碟，然後選擇建立還原 USB。

5

- The window will pop out when the creation of recovery disk is done.
跳出結束視窗後即完成。
- Please press F12 on starting the system when you need to restore the system. Select “boot from recovery USB disk” and the system will be restored.
若要還原您的系統，請在開機時按 F12，選擇用【USB 隨身碟開機】，【USB 隨身碟】會自動完成還原您的系統。
- The time needed for restore will be around 30 mins(time needed may vary by USB disk model) .
還原時間約需 30 分鐘（所需時間會因 USB 隨身碟種類而有所不同）。
